UP AND COMING DEVELOPMENTS

- International Cruise Terminal**
The new international cruise terminal at Marina South, when completed in 2011, will be able to host the world's largest Oasis-class cruise ships and handle 6,800 passengers at any one time, doubling Singapore's berth capacity. The 28,000sqm terminal, equivalent to about three football fields, is one of the biggest in Asia.
- Gardens By The Bay**
Singapore's second botanic gardens, Gardens by the Bay, will be completed in 2011. Situated in the heart of Singapore's new downtown Marina Bay area, it boasts three upcoming waterfront gardens that will not only be populated with diverse flora, but will also feature new and exciting dining concepts. The range of dining facilities will be planted among key features in the garden. Visitors can choose from a vast selection of dining options including a restaurant in a Mediterranean garden setting, the panoramic 50m Supertree Bar, Supertree Grove casual dining right at the centre of the Gardens, and a Satay Club by the waterfront.
- Changi Motorsports Hub**
Changi Motorsports Hub is on track to be completed by end 2011 and it promises to be more than just a racing venue for professional races. The 3.7km long FIA Grade 2 Track will not be able to host F1 races, but other events that are being planned. The hub aims to be a 24/7 lifestyle destination. Among the attractions are F&B outlets and a museum. Other highlights include a warehouse for 750 cars and even a hotel.

- Marine Life Park**
At Resorts World™ Sentosa, this showcase for ocean science education, research and stewardship will have 700,000 fish in 20 million gallons of water. Guests can swim with giant whale sharks and dolphins or dive with and feed tiger sharks. Once open, it will be the largest oceanarium in the world.
- River Safari**
The new river theme park, carved out of the same Mandai area which houses the Zoo and Night Safari, will open by 2012. River Safari – the first of its kind in Asia – seeks to educate visitors on the conservation of freshwater habitats, and also introduce them to the ecosystem's interesting water wildlife. It will have some new species of wildlife, boat rides and special displays of freshwater habitats with opportunities for visitors to interact with animals in freshwater habitats.
