

Making Sustainable Decisions

Tour East Group is taking initiative on environmentally friendly ways to be mindful to what we use, and to be respectful of our surroundings. Following 4R is our first step to spread the sustainable minds, and Tour East Group encourages the staff to;

Refuse – Choose to say no

Reduce – Choose not to purchase unnecessary items

Reuse – Choose to be creative to use in multiple ways

Recycle – Choose the sustainable materials that can be used again in different and/or same form

- Purchase long term products approved of its eco-friendliness and those which are recognized with eco-mark, FSC, PEFC, fair trade, and other sustainably certified products when necessary.
- Avoid purchasing plastic bottles or plastic bags, and bring own tumblers or eco-bags instead as sustainable alternative.
- Always try to reduce the energy consumption by choosing the product which has energy saving mode, or the similar function.
- Reduce unnecessary printing to avoid using more papers, inks, and electricity; instead, choose to have electronic data.
- Compile the packaging whenever possible to reduce the materials used.
- Always try to know and compare before purchasing new office supplies.
